ABOUT SPORTECH

ABOUT

ABOUT SPORTECH

INTEGRATED SPORTS CONSTRUCTION & FLOORING SOLUTIONS

Sportech Contracting & Supplies is an Egyptian company specializing in sports construction, sports flooring systems, and integrated solutions for sports, recreational, and specialized facilities.

Built on extensive industry experience and a strong understanding of the sports construction sector, Sportech delivers a comprehensive range of services, covering technical consultation, system selection, material supply, construction, installation, and after-sales support.

Our expertise extends across a wide variety of projects, including sports fields, indoor sports halls, multi-purpose courts, fitness facilities, children's play areas, and specialized flooring applications.

At Sportech, we believe that every successful project starts with understanding the client's requirements and selecting the right technical solution. We combine practical experience, qualified technical teams, carefully selected materials, and modern installation techniques to deliver projects that meet the required standards of quality, performance, safety, and durability.

Through our commitment to reliability, transparency, and continuous development, we aim to build long-term partnerships with developers, contractors, consultants, clubs, and institutions.

CORPORATE COMMITMENT

At Sportech, we don't just supply products or install flooring systems — we deliver complete solutions that bring spaces to life.

VM

SPOR-TECH // 2027 EDITION

OUR VISION & MISSION

VISION OUR VISION

To become a leading regional provider of integrated sports construction and specialized flooring solutions, recognized for technical excellence, reliable execution, innovation, and lasting value.

MISSION OUR MISSION

7 STRATEGIC PILLARS

Our mission is to strengthen Sportech's position as a leading company in sports construction and specialized flooring solutions through seven key strategic pillars:

1. Building a Strong, Integrated Team

To build and maintain a collaborative team that brings together diverse skills, professional expertise, and complementary capabilities, working together towards shared goals and sustainable success.

2. Continuous Learning & Development

To continuously train and develop our technical teams in modern sports construction technologies, advanced installation techniques, and the latest industry practices, ensuring ongoing improvement in our execution capabilities.

3. Strengthening Our Market Position

To maintain and strengthen our established presence in the Egyptian market, building on our position among the industry's top ten companies, our extensive client network, proven project portfolio, and accumulated experience.

4. Regional Market Expansion

To expand our presence beyond Egypt by pursuing strategic opportunities in African and Gulf markets, establishing new partnerships, and delivering our expertise to a wider regional client base.

5. Expanding Our Services & Capabilities

To continuously broaden our range of services and execution capabilities, offering more comprehensive solutions that respond to the evolving needs of sports, recreational, and specialized facilities.

6. Innovation, Diversification & Quality

To develop innovative sports solutions, diversify our product portfolio and sourcing channels, and maintain a strong commitment to quality, technical specifications, and internationally recognized standards.

7. Pursuing Major Projects & Strategic Partnerships

To target major clients, prestigious developments, and world-class sports projects both in Egypt and internationally, building long-term partnerships and contributing to outstanding projects in the sports construction industry.

OUR CORE VALUES

VALUES

OUR CORE VALUES

FOUNDATIONAL PRINCIPLES GUIDING EVERY SPORTECH PROJECT

1. Quality & Excellence

We are committed to delivering high-quality products and workmanship that meet project requirements and expected performance standards.

2. Integrity & Transparency

We build our relationships on honesty, credibility, and clear communication.

3. Commitment & Reliability

We take responsibility for our commitments and strive to deliver every project with professionalism and consistency.

4. Technical Expertise

We rely on practical experience, technical knowledge, and continuous development to provide the right solutions.

5. Customer Partnership

We believe in building long-term relationships by understanding our clients' needs and supporting them throughout the project lifecycle.

6. Continuous Improvement

We continuously seek better materials, technologies, and working methods to enhance the value we deliver.

WHY SPORTECH?

ADVANTAGE

WHY SPORTECH?

ONE PARTNER. COMPLETE SOLUTIONS.

01 Integrated Project Execution

From initial assessment and technical planning to construction, supply, installation, and final handover.

02 Extensive Industry Experience

A team with extensive experience in sports construction and specialized flooring applications.

03 Technical Product Knowledge

Careful selection of materials and systems based on project requirements, intended use, and technical specifications.

04 Qualified Execution Teams

Specialized technical personnel supported by appropriate equipment and installation methods.

05 International Product Partnerships

Cooperation with international manufacturers and suppliers to provide a wide range of specialized products and solutions.

06 After-Sales Support

Continued client support through maintenance, renovation, and product warranty services.

NATURAL TURF

01 NATURAL TURF FOOTBALL FIELDS

COMPLETE NATURAL TURF PITCH CONSTRUCTION SOLUTIONS

Sportech delivers complete natural turf football field construction, integrating civil works, ground preparation, drainage, irrigation, soil preparation, and grass establishment to create high-quality playing surfaces tailored to project requirements.

1. Playing Performance & Surface Quality
Well-designed natural turf pitches provide a consistent playing surface, healthy grass coverage, and suitable playing conditions for football training and competition.

2. Integrated Construction & Installation
From initial site preparation and earthworks to drainage networks, irrigation systems, rootzone preparation, and grass installation, Sportech coordinates the essential stages of natural turf pitch construction.

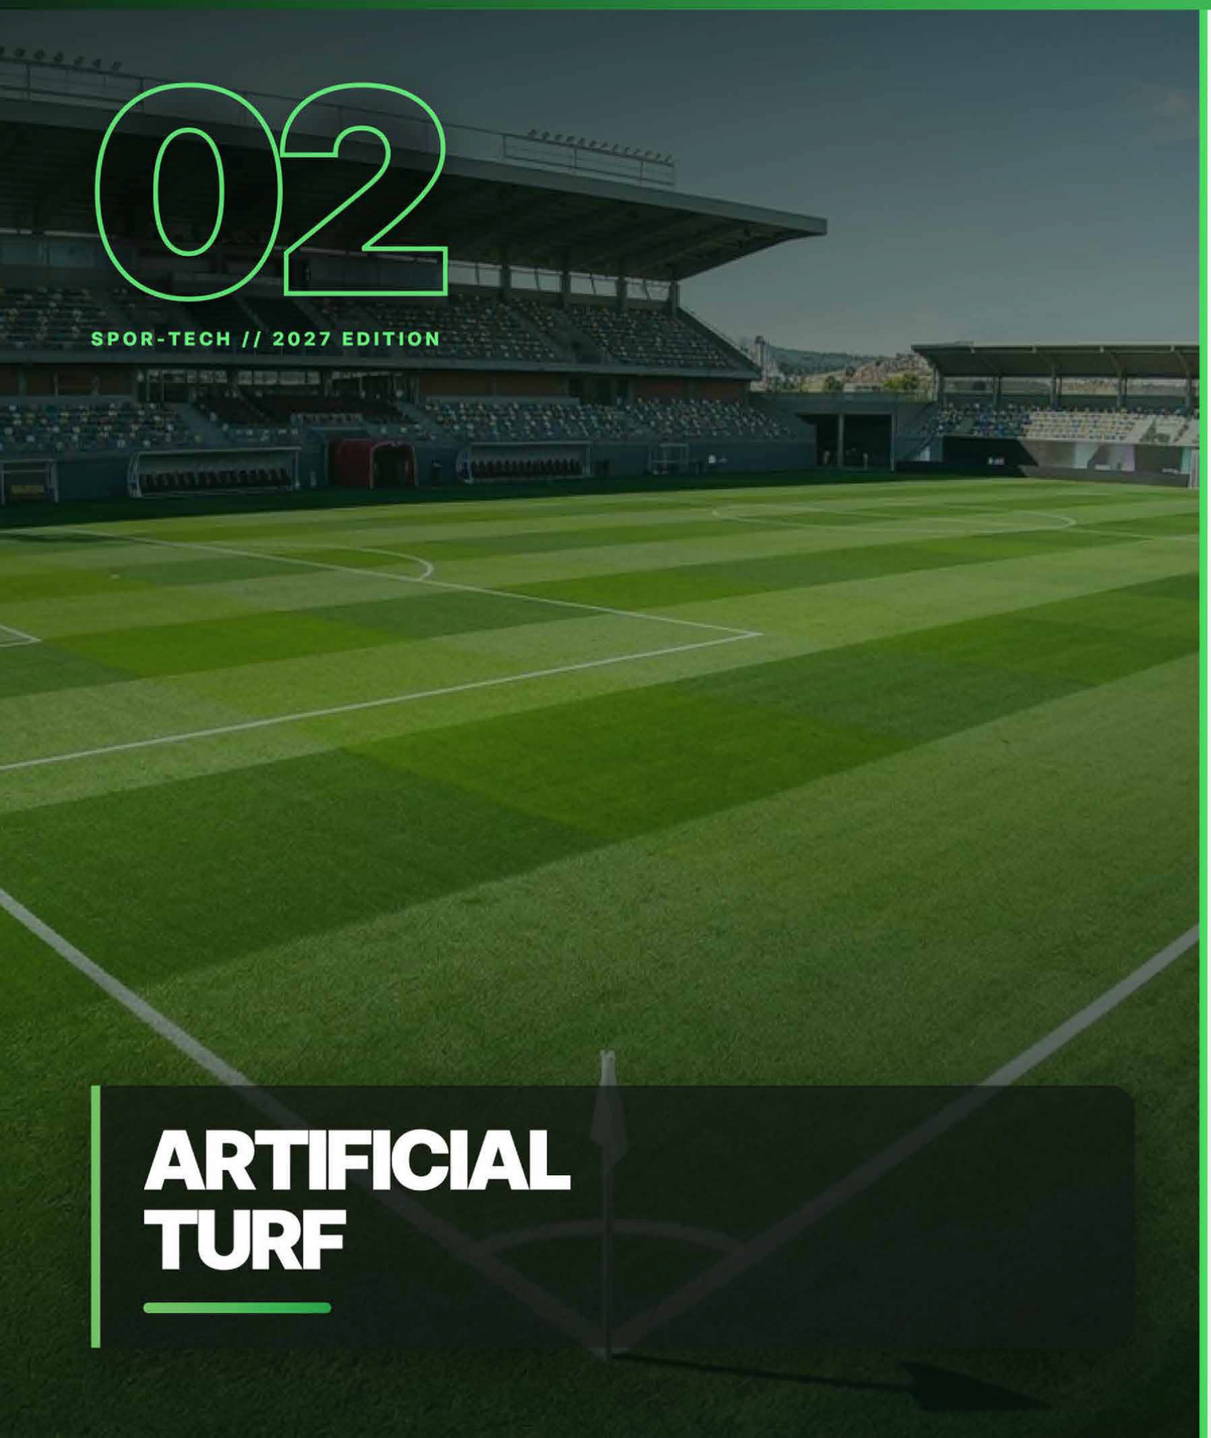
3. Tailored Solutions for Sports Facilities
Our natural turf solutions can be developed for sports clubs, training grounds, and football facilities, with construction specifications adapted to site conditions and intended use.

4. Drainage, Irrigation & Turf Establishment
Effective drainage, properly designed irrigation, and suitable rootzone materials support healthy grass development, water management, and long-term surface performance.

KEY CONSTRUCTION STAGES

01 Site Preparation & Earthworks
02 Ground Formation & Leveling
03 Drainage Network Installation
04 Irrigation System Installation
05 Rootzone Preparation & Grass Installation
06 Turf Establishment, Maintenance & Handover

Construction methods, material specifications, and layer designs are determined according to site conditions, the selected turf system, and project requirements.



02

SPOR-TECH // 2027 EDITION

ARTIFICIAL TURF

02 ARTIFICIAL TURF SYSTEMS

COMPLETE ARTIFICIAL TURF FOOTBALL PITCH CONSTRUCTION

Sportech delivers artificial turf football pitch solutions, combining civil works, sub-base construction, drainage, turf installation, and finishing works to develop durable playing surfaces suited to the project's requirements and intended use.

1. High-Performance Playing Surfaces
Artificial turf systems are selected according to the required playing characteristics, expected usage, and project specifications, helping create a consistent surface for training and competition.

2. Civil Works & Sub-Base Preparation
A properly prepared foundation is essential for surface stability and long-term performance. Our construction approach incorporates ground formation, leveling, compaction, and suitable drainage provisions according to site conditions.

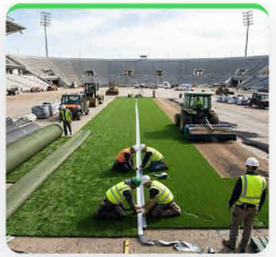
3. Professional Turf Installation
The installation process includes turf layout, seam joining, perimeter fixing, infill application where specified, and line marking in accordance with the selected system's requirements.

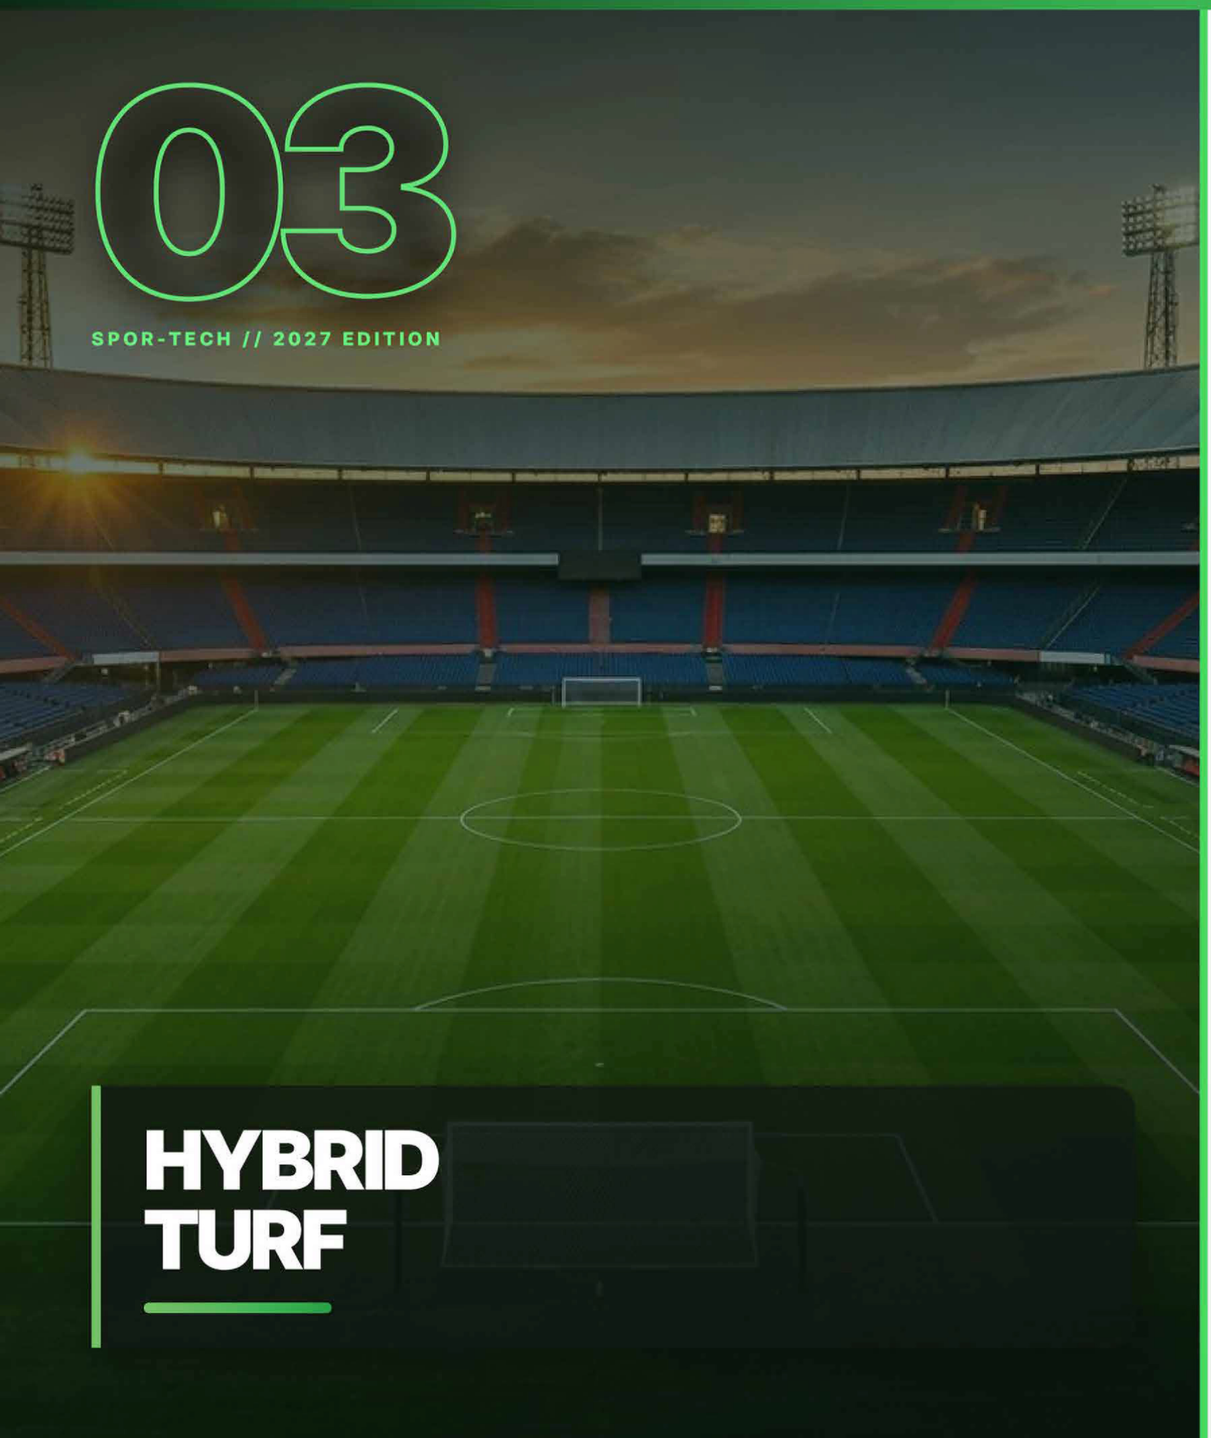
4. Integrated Project Delivery
By coordinating the essential construction and installation stages, Sportech aims to provide a consistent, well-finished sports surface that meets the technical and operational needs of each project.

KEY CONSTRUCTION STAGES

01 Site Inspection & Technical Assessment
02 Earthworks & Sub-Base Construction
03 Leveling, Compaction & Drainage Works
04 Artificial Turf Supply & Installation
05 Seam Joining, Infill & Line Marking
06 Final Inspection & Handover

The turf type, infill material, base construction, and technical specifications are determined according to the selected system and project requirements.





03

SPOR-TECH // 2027 EDITION

HYBRID TURF

03 HYBRID TURF TECHNOLOGY

COMBINING NATURAL GRASS WITH REINFORCEMENT TECHNOLOGY

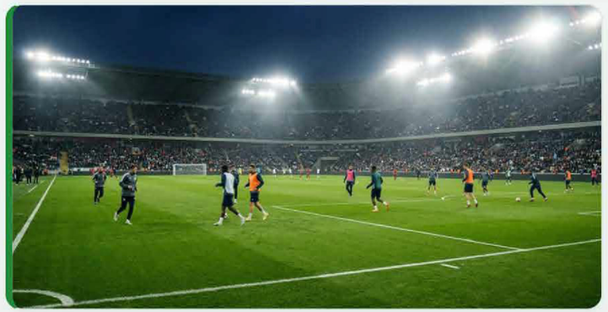
Hybrid turf systems combine natural grass with a reinforcing structure designed to support the playing surface under demanding usage conditions. System selection depends on the required playing characteristics, maintenance strategy, and operational demands of the facility.

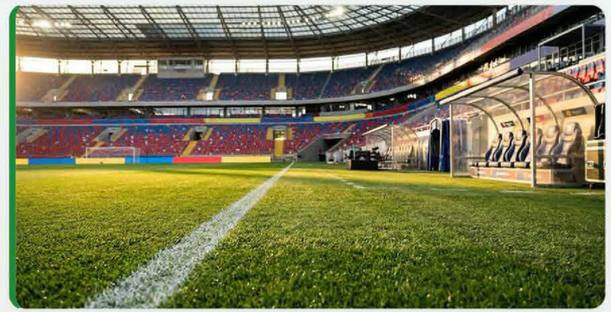
1. Reinforced Playing Surface
Hybrid turf technology is designed to improve the stability and resilience of the natural grass surface while preserving the playing characteristics associated with natural turf.

2. System Selection & Technical Assessment
The appropriate hybrid system is selected according to the project design, expected playing hours, climatic conditions, maintenance resources, and performance requirements.

3. Integrated Ground Preparation
A suitable foundation, rootzone, drainage arrangement, and irrigation strategy are important elements in supporting grass growth and the performance of the selected hybrid system.

4. Long-Term Surface Management
Successful hybrid turf performance depends on appropriate installation, grass establishment, routine maintenance, and ongoing assessment of the playing surface.

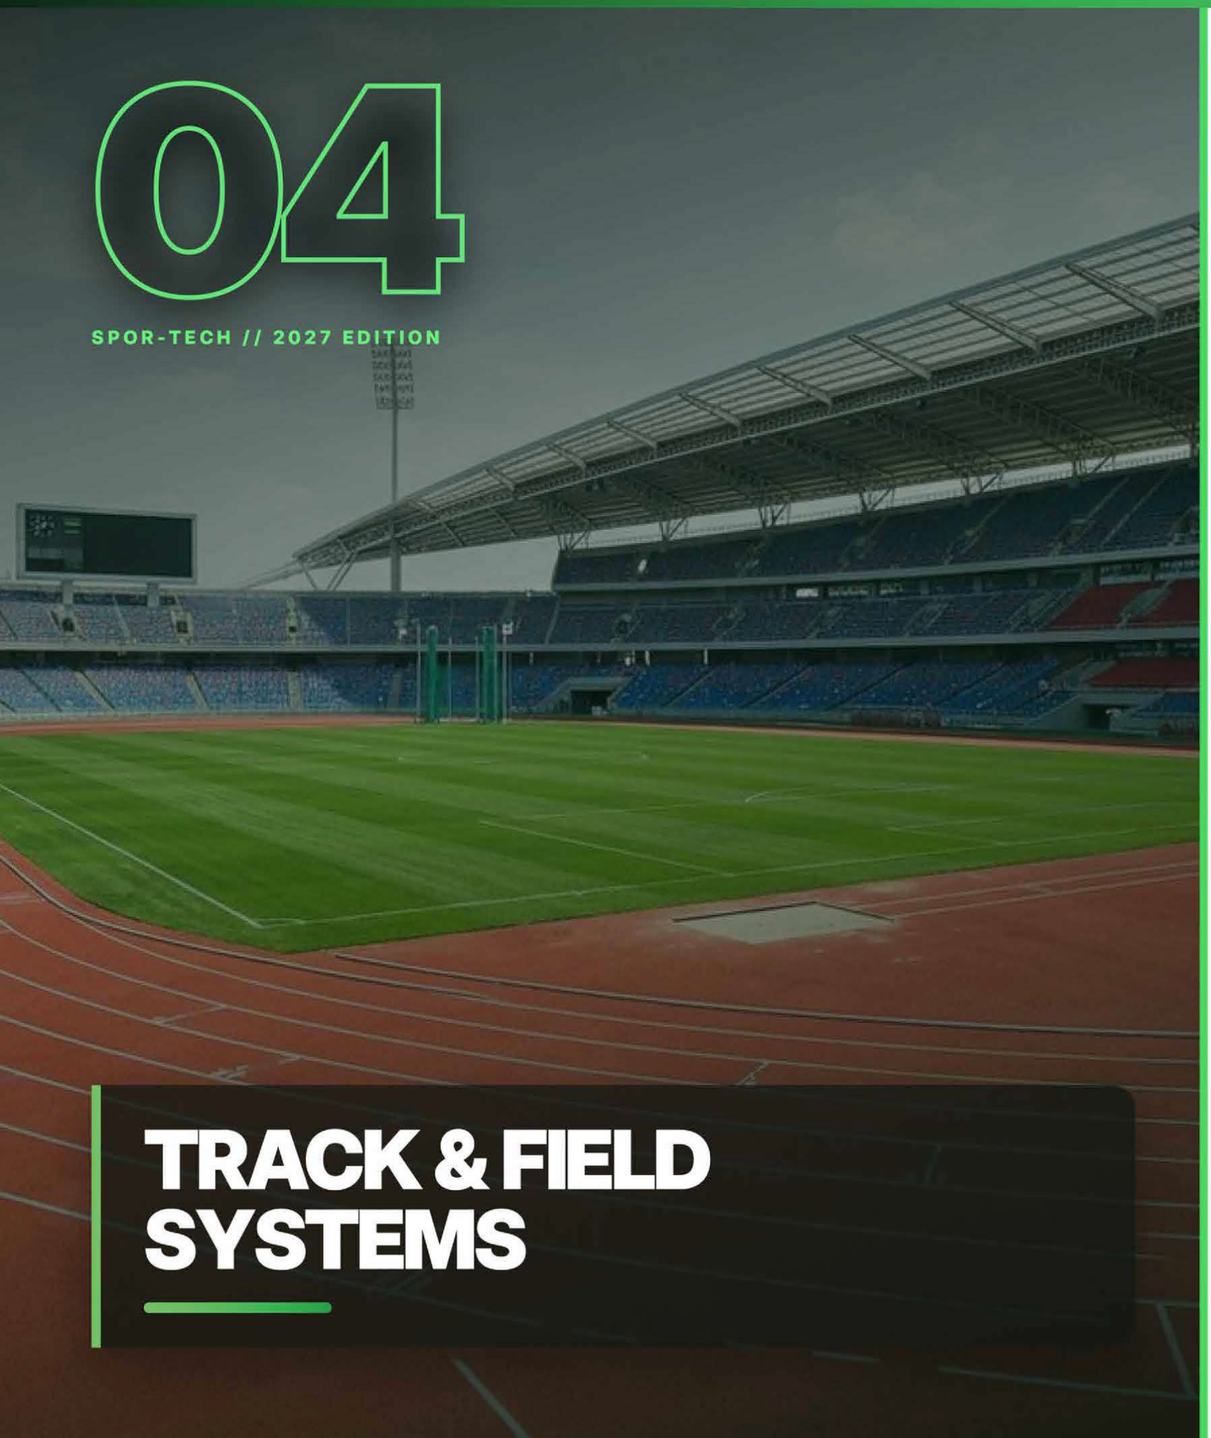




KEY PROJECT STAGES

01 Site Assessment & System Selection
02 Ground Preparation & Drainage Planning
03 Rootzone Preparation
04 Hybrid Reinforcement System Installation
05 Grass Establishment & Irrigation
06 Surface Inspection & Maintenance Planning

Hybrid turf technologies differ in construction method and reinforcement design. The final system and specifications should be selected according to the manufacturer's recommendations and project requirements.



04

SPOR-TECH // 2027 EDITION

TRACK & FIELD SYSTEMS

04 TRACK & FIELD SYSTEMS

ATHLETICS TRACKS & SPORTS PERFORMANCE SURFACES

Sportech provides solutions for athletics tracks and running surfaces, with system selection and construction details adapted to the facility's intended use, site conditions, and technical requirements.

1. Running Track Systems
Running tracks can be developed using suitable synthetic surface systems designed to provide consistent underfoot characteristics for training and athletic activities.

2. Base Preparation & Surface Accuracy
Proper grading, stable base construction, and accurate level control are essential to achieving a uniform surface and supporting appropriate water management.

3. Surface System Selection
Different track systems offer different characteristics in terms of construction, texture, cushioning, and maintenance. Selection should be based on the intended level of use and the project's technical requirements.

4. Finishing & Track Markings
Careful installation, accurate lane markings, and proper finishing help create a clearly defined athletics facility suitable for its intended activities.

KEY CONSTRUCTION STAGES

01 Site Survey & Layout Planning
02 Earthworks & Base Preparation
03 Leveling, Grading & Drainage
04 Installation of the Selected Track System
05 Lane Marking & Finishing
06 Final Inspection & Handover

Track construction, performance characteristics, and certification requirements must be established according to the selected system and the applicable project standards.

05

SPOR-TECH // 2027 EDITION

TENNIS COURT SYSTEMS

COMPLETE TENNIS COURT CONSTRUCTION & SURFACING

Sportech provides tennis court construction and surfacing solutions designed around the intended playing level, site conditions, and project specifications. The scope can incorporate court foundations, drainage, sports surfacing, line marking, fencing, and associated accessories.

1. Multiple Surface Options

Tennis courts can be developed using different surface systems, including acrylic, synthetic, and clay-based systems, subject to project requirements and the suitability of the selected product.

2. Foundation & Drainage

A stable foundation, accurate court grading, and suitable drainage provisions are essential for surface consistency and effective rainwater management.

3. Precision Surfacing & Line Marking

The selected surface system must be installed according to its technical requirements, with careful attention to uniformity, adhesion, finishing, and accurate court markings.

4. Complete Court Infrastructure

Court planning may include perimeter fencing, access gates, lighting provisions, and playing equipment, coordinated with the overall layout and intended use of the facility.

KEY CONSTRUCTION STAGES

01 Site Assessment & Court Layout

02 Earthworks, Base Construction & Drainage

03 Installation of the Selected Court Surface

04 Line Marking & Finishing

05 Fencing, Gates & Sports Equipment

06 Final Inspection & Handover

Surface selection, court dimensions, slopes, and construction details should comply with the applicable requirements for the intended level of play.

06

SPOR-TECH // 2027 EDITION

PADEL TENNIS COURTS

06 PADEL TENNIS COURTS

COMPLETE PADEL COURT DESIGN, CONSTRUCTION & INSTALLATION

Sportech provides comprehensive solutions for the design, construction, supply, and installation of padel tennis courts, delivering high-quality playing facilities for sports clubs, hotels, resorts, residential communities, and commercial developments. Our scope covers the complete court construction process, from site preparation and foundation works to the installation of structural steel frames, glass panels, artificial turf, lighting systems, and court accessories.

1. Court Structure & Glass Systems
We provide and install engineered steel structures and high-quality tempered glass panels, designed to meet the functional and structural requirements of padel courts. Attention is given to structural stability, glass fixing details, alignment, and overall installation quality.

2. Artificial Turf Systems
We offer specialized artificial turf systems suitable for padel courts, selected according to playing characteristics, durability, ball response, and project requirements. Installation includes proper surface preparation, turf fixing, jointing, line marking, and infill application where required.

3. Foundations & Drainage Works
Proper foundation preparation and drainage are essential to the long-term performance of outdoor padel courts. Our scope includes the required civil works, concrete bases, surface levels, drainage provisions, and coordination with site conditions to help prevent water accumulation.

4. Lighting & Court Accessories
We provide and install suitable lighting systems and essential court accessories to support safe and comfortable playing conditions. Solutions are selected according to court configuration, usage requirements, and project specifications.

KEY PROJECT STAGES

01 Site Assessment & Technical Planning
02 Excavation & Foundation Preparation
03 Concrete Base & Drainage Works
04 Steel Structure & Glass Installation
05 Artificial Turf Installation & Line Marking
06 Lighting & Accessories Installation
07 Final Inspection & Handover

Court dimensions, structural specifications, glass thickness, turf type, lighting levels, and drainage arrangements are determined according to the selected court system, project requirements, and applicable technical standards.

07

SPOR-TECH // 2027 EDITION

OUTDOOR MULTI-SPORT COURTS

07 OUTDOOR MULTI-SPORT COURTS

VERSATILE OUTDOOR SPORTS FACILITIES

Sportech develops outdoor multi-sport court solutions designed to accommodate different sporting activities within a practical and well-organized space. Each court layout and surface system is selected according to the sports to be played, site conditions, and project requirements.

1. Flexible Court Layouts
Multi-sport facilities can be planned to support selected activities such as basketball, volleyball, and other compatible court sports, subject to the layout and applicable playing requirements.

2. Durable Outdoor Surfacing
The surface system should be appropriate for outdoor exposure, expected usage, and the required playing characteristics, with material selection based on the project specifications.

3. Foundation, Drainage & Markings
Proper base preparation, surface grading, rainwater management, and accurate sport-specific line markings contribute to a functional and clearly organized playing area.

4. Integrated Sports Equipment
Court development may include suitable goals, posts, nets, fencing, and other accessories according to the sports selected for the facility.

KEY CONSTRUCTION STAGES

01 Site Assessment & Sports Layout
02 Ground Preparation & Base Construction
03 Drainage & Surface Installation
04 Sport-Specific Line Marking
05 Equipment & Perimeter Installation
06 Final Inspection & Handover

The final layout must account for the dimensions, safety clearances, equipment requirements, and markings of the selected sports.

08

SPOR-TECH // 2027 EDITION

PADBOL COURTS

08 PADBOL COURTS

SPECIALIZED PADBOL COURT SOLUTIONS

Sportech provides Padbol court solutions designed to bring this dynamic combination of football and court-based play to sports clubs, recreational facilities, and leisure destinations. Court configuration and construction details are determined by the selected system and project requirements.

1. Purpose-Designed Court Configuration
Padbol courts require a dedicated layout incorporating the playing area, enclosure, access arrangements, and suitable playing surface.

2. Structural Enclosure System
The enclosure is an essential part of the court, helping define the playing area and support the characteristic style of play. Structural components and connections must be suitable for the intended use.

3. Playing Surface & Installation
The playing surface should be selected according to the chosen court system, with careful attention to base preparation, surface uniformity, and installation quality.

4. Complete Court Integration
A Padbol project may include the court structure, enclosure panels, access door, playing surface, lighting provisions, and associated accessories, according to the agreed scope.

KEY PROJECT STAGES

01 Site Assessment & Court Layout
02 Foundation & Base Preparation
03 Structural Enclosure Installation
04 Playing Surface Installation
05 Accessories & Optional Lighting
06 Final Inspection & Handover

Court dimensions, structural details, materials, and installation requirements should follow the selected system's technical documentation.

09

SPOR-TECH // 2027 EDITION

PICKLEBALL COURTS

09

PICKLEBALL COURTS

PICKLEBALL COURT CONSTRUCTION & SURFACING

Sportech provides pickleball court solutions for sports clubs, schools, residential communities, hotels, and recreational facilities. Court design and surfacing are adapted to the available space, intended level of play, and project requirements.

1. Accurate Court Layout
Correct court dimensions, boundary lines, net positioning, and player clearance areas are essential to creating a functional playing environment.

2. Suitable Playing Surfaces
The selected surface should provide appropriate traction, consistent playing characteristics, and suitability for the intended indoor or outdoor application.

3. Base Preparation & Water Management
For outdoor courts, a stable foundation, accurate grading, and effective drainage provisions help protect the surface and reduce water accumulation.

4. Equipment & Finishing
Court completion may include nets, posts, line markings, fencing, and other accessories according to the selected layout and project scope.

KEY CONSTRUCTION STAGES

01 Site Assessment & Layout Planning
02 Base Preparation & Drainage
03 Sports Surface Installation
04 Court Line Marking
05 Net System & Accessories
06 Final Inspection & Handover

Court dimensions, clearances, markings, and equipment should follow the applicable rules for the intended level of play.

10

SPOR-TECH // 2027 EDITION

SQUASH COURTS

10 SQUASH COURTS

SQUASH COURT CONSTRUCTION & INTERIOR FINISHING

Squash courts require carefully coordinated construction and finishing to create a controlled playing environment. Sportech's squash court solutions can be planned around the court enclosure, playing walls, flooring, lighting, and associated equipment, according to the project scope.

1. Court Layout & Dimensional Accuracy
Accurate court geometry and appropriate clearances are essential to the playing experience and must be established during the design and construction stages.

2. Wall & Enclosure Systems
Squash court walls and enclosure components must be suitable for the intended use, with attention to surface uniformity, impact resistance, and the requirements of the selected court system.

3. Sports Flooring
The playing floor should provide suitable grip, consistent ball response, and appropriate characteristics for squash, with material selection based on the intended level of play.

4. Lighting & Court Accessories
Proper lighting, door arrangements, and suitable sports accessories contribute to visibility, usability, and the overall functionality of the court.

KEY PROJECT STAGES

01 Site Survey & Court Layout
02 Structural and Wall Preparation
03 Wall Finishing & Flooring Installation
04 Door, Lighting & Accessory Installation
05 Court Inspection & Finishing
06 Handover

Court dimensions, wall performance, flooring characteristics, and equipment must be verified against the applicable squash court requirements and selected system.

11

SPOR-TECH // 2027 EDITION

INDOOR SPORTS HALLS

11 INDOOR SPORTS HALLS

INTEGRATED INDOOR SPORTS HALL SOLUTIONS

Sportech provides solutions for indoor sports facilities, coordinating sports flooring, court layouts, equipment, and associated construction requirements to create functional environments for training, education, and competition.

1. Sports Flooring Systems
Flooring selection depends on the intended sports, frequency of use, impact-management requirements, and the characteristics of the building. Options may include sports vinyl, polyurethane, timber, or other suitable systems where specified.

2. Court Layouts & Markings
Indoor halls can be planned to accommodate selected activities such as basketball, volleyball, handball, and badminton, subject to the available dimensions and the required clearances for each sport.

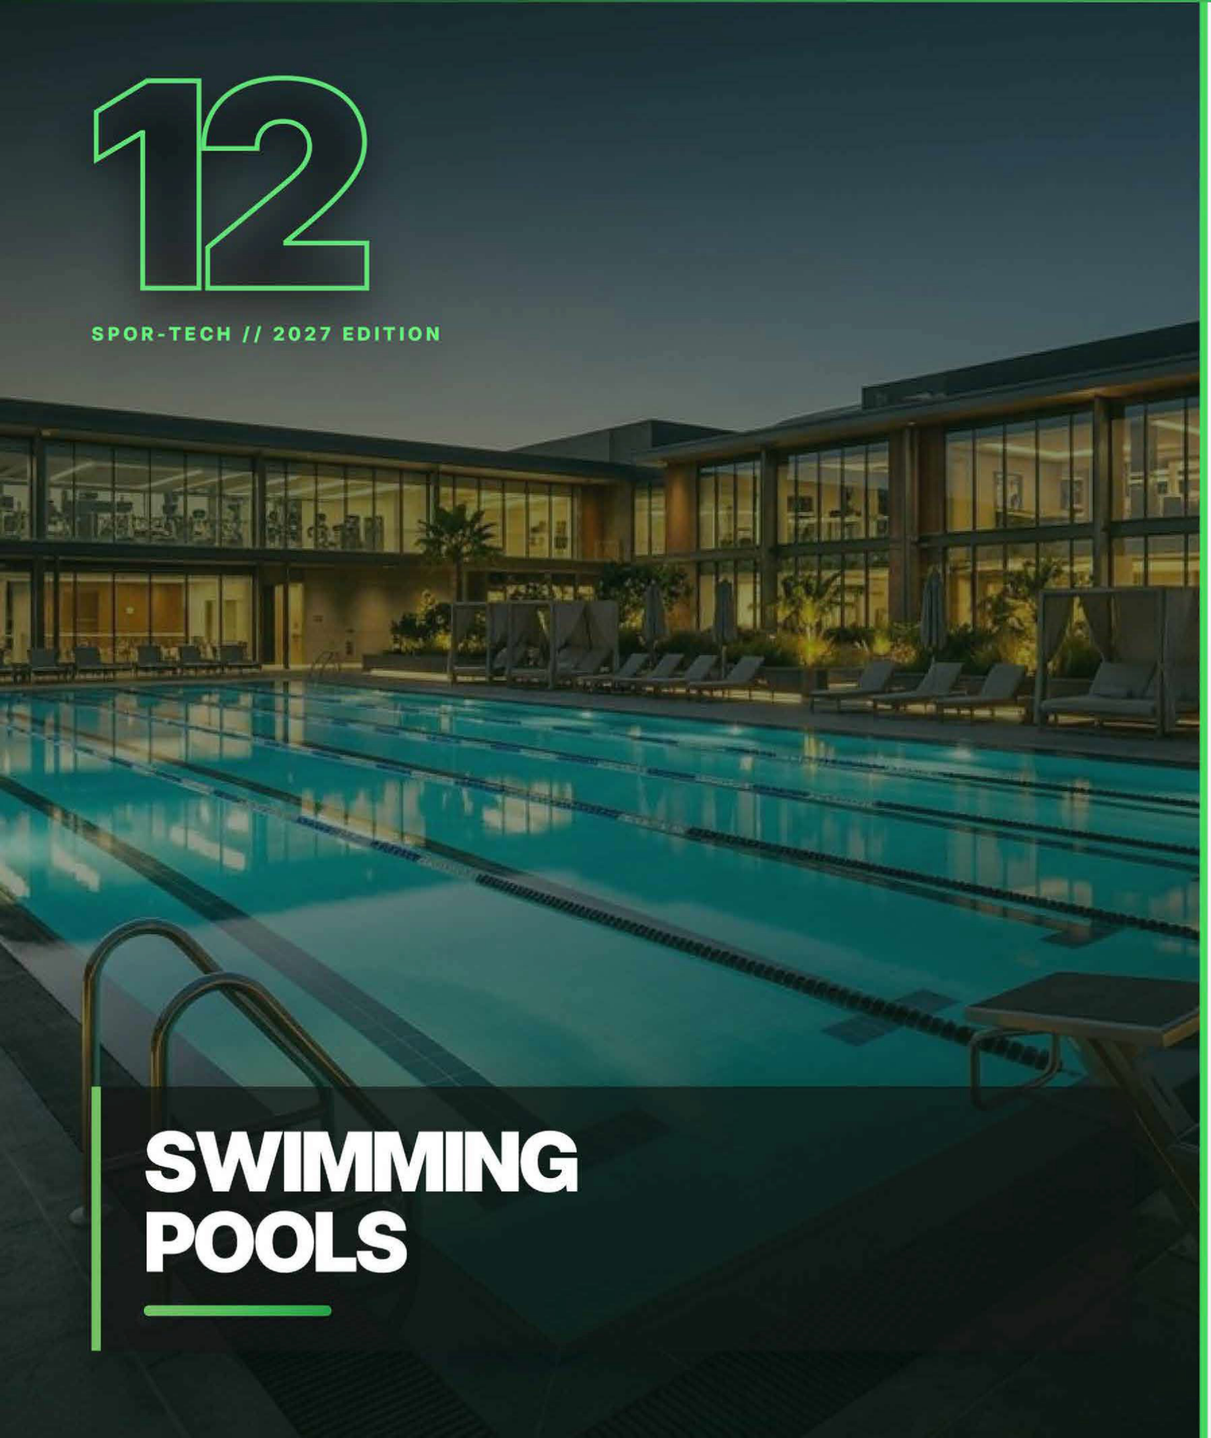
3. Sports Equipment & Accessories
The facility may incorporate goals, basketball systems, volleyball posts, badminton equipment, protective padding, and other accessories appropriate to the sports being provided.

4. Supporting Infrastructure
Lighting, ventilation, wall protection, access, and equipment storage should be coordinated with the hall layout to support safe and efficient facility operation.

KEY PROJECT STAGES

01 Site Assessment & Sports Planning
02 Substrate Inspection & Preparation
03 Flooring System Installation
04 Court Marking & Equipment Installation
05 Finishing & Quality Inspection
06 Handover

The final flooring and equipment specifications depend on the intended sports, building conditions, and applicable technical requirements.



12

SPOR-TECH // 2027 EDITION

SWIMMING POOLS

12 SWIMMING POOLS

SWIMMING POOL CONSTRUCTION & FINISHING SOLUTIONS

Swimming pool projects require careful coordination of structural works, waterproofing, hydraulic systems, finishes, and safety-related components. The appropriate construction approach depends on the pool type, intended use, site conditions, and project specifications.

1. Pool Structure & Preparation
Pool construction begins with appropriate site assessment, excavation, structural design, and preparation of the pool shell according to the approved engineering requirements.

2. Waterproofing & Interior Finishes
Suitable waterproofing and compatible finishing materials are essential to protect the pool structure and achieve the required appearance and performance.

3. Hydraulic & Circulation Systems
Pool circulation, filtration, water treatment, and associated pipework must be coordinated to meet the pool's design capacity and operational requirements.

4. Surrounding Areas & Safety
Poolside finishes, drainage, access points, and associated features should be selected with attention to slip resistance, water management, and the needs of users.

KEY PROJECT STAGES

01 Site Assessment & Engineering Design
02 Excavation & Structural Construction
03 Waterproofing & Testing
04 Hydraulic, Filtration & Treatment Systems
05 Interior Finishes & Surrounding Areas
06 Testing, Commissioning & Handover

Structural design, waterproofing details, hydraulic specifications, and safety provisions must be established by qualified professionals in accordance with applicable codes and project requirements.

13

SPOR-TECH // 2027 EDITION

KIDS' PLAY AREAS

13 KIDS' PLAY AREAS

SAFE & ENGAGING PLAY ENVIRONMENTS

Sportech provides play-area solutions designed to create attractive and functional spaces for children's recreation. Layouts, play equipment, and safety surfacing should be selected according to the age groups, expected activities, site conditions, and applicable safety requirements.

1. Play Area Planning
Effective planning considers circulation, activity zones, supervision, accessibility, and the available space to create an organized play environment.

2. Impact-Absorbing Safety Surfaces
Suitable safety surfacing can help reduce the severity of injuries associated with falls when correctly selected and installed for the equipment's critical fall height and the site requirements.

3. Play Equipment & Activity Zones
Play areas may incorporate age-appropriate play equipment and designated activity zones, selected according to the project brief and the relevant safety requirements.

4. Outdoor Durability & Maintenance
Materials and equipment should be suitable for the intended indoor or outdoor environment, with attention to weather exposure, drainage, inspection, and maintenance.

KEY PROJECT STAGES

01 Site Assessment & User Requirements
02 Play Area Layout & Equipment Selection
03 Ground Preparation & Drainage
04 Safety Surfacing Installation
05 Play Equipment Installation
06 Inspection & Handover

Equipment selection, safety-surface thickness, and impact-attenuation performance must be matched to the applicable safety requirements and equipment fall heights.

14

SPOR-TECH // 2027 EDITION

GYM, FITNESS & CROSSFIT FLOORING

14 GYM, FITNESS & CROSSFIT FLOORING

SPECIALIZED FLOORING FOR FITNESS & TRAINING FACILITIES

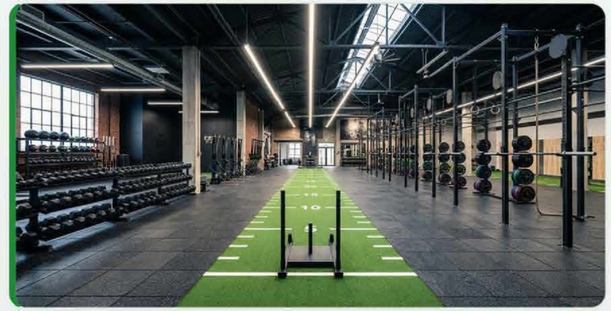
Sportech provides flooring solutions for gyms, fitness studios, functional training areas, and CrossFit facilities. Flooring selection is based on the activities performed, equipment loads, impact exposure, acoustic considerations, and substrate conditions.

1. Impact & Load Management
Fitness flooring should be selected to suit the expected loads and activities, including free weights, functional training, and general exercise, while protecting the underlying floor where required.

2. Rubber Flooring Solutions
Rubber rolls, tiles, and other suitable rubber flooring formats can provide resilient surfaces for a range of gym applications, depending on thickness, density, installation method, and product characteristics.

3. Acoustic & Vibration Considerations
In facilities where noise and vibration transmission are concerns, the flooring assembly should be assessed according to the equipment, building structure, and required acoustic performance.

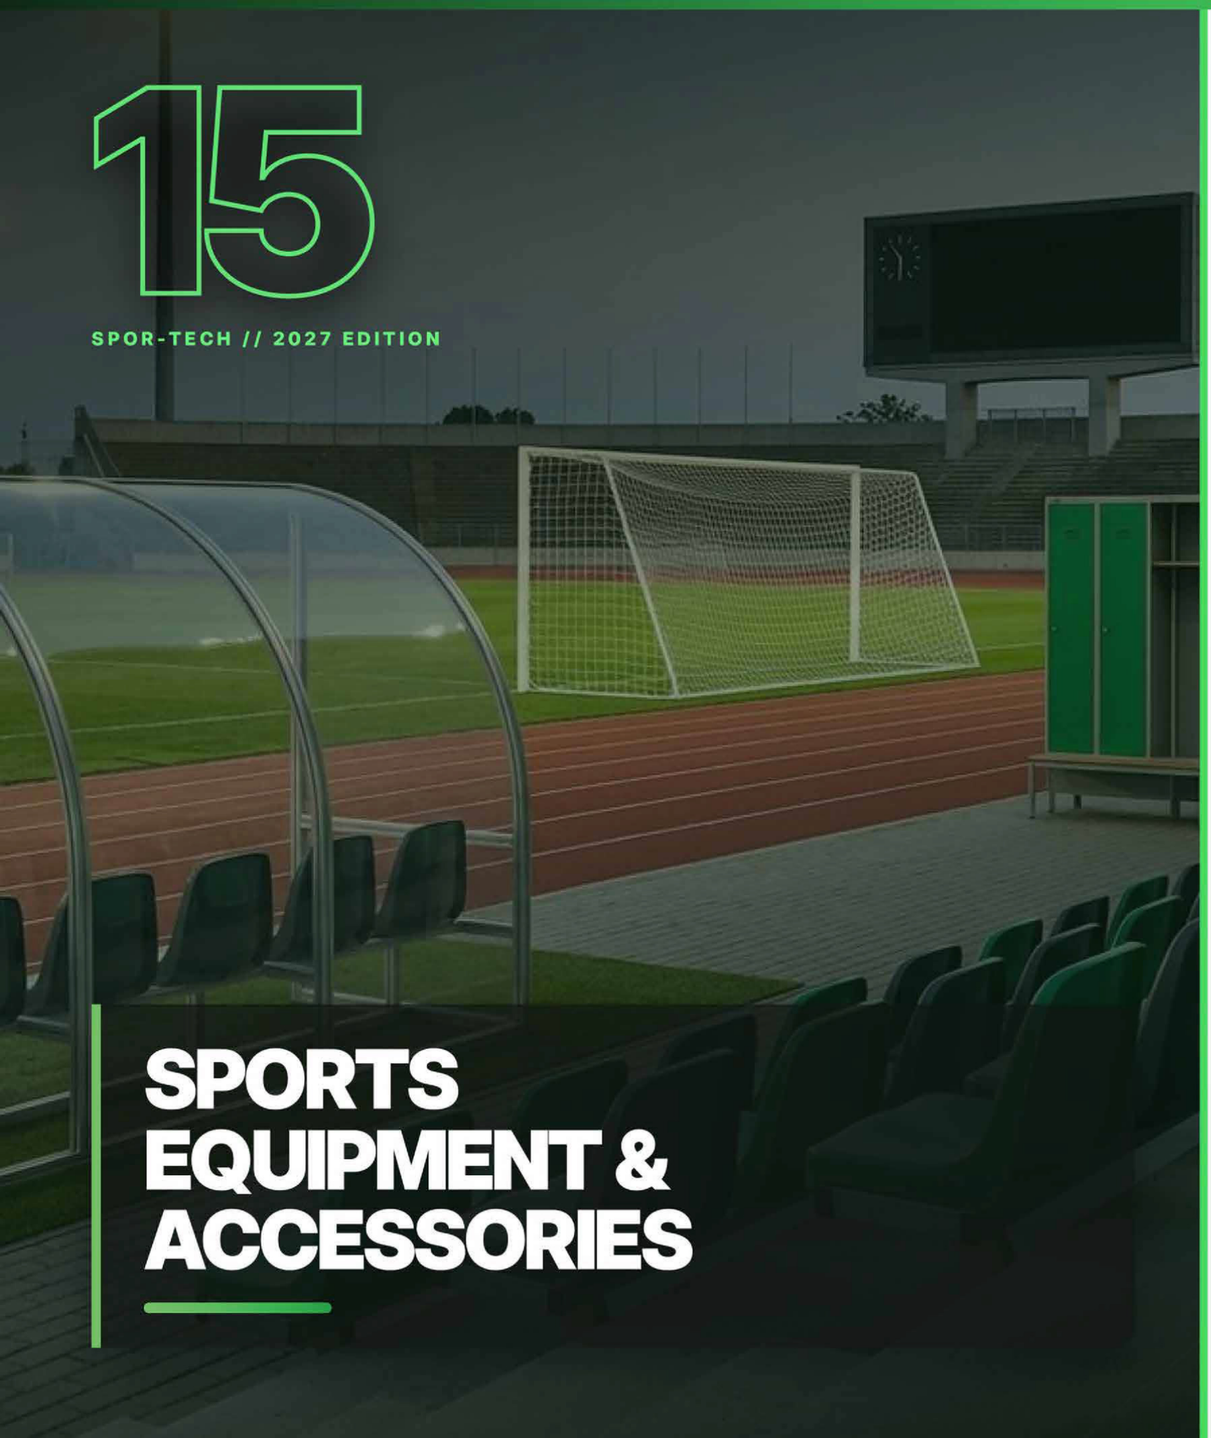
4. Installation & Surface Finishing
A properly prepared substrate, suitable adhesive or fixing method, accurately finished joints, and appropriate edge details contribute to the appearance and performance of the completed floor.



KEY INSTALLATION STAGES

01 Site Assessment & Activity Planning
02 Substrate Inspection & Preparation
03 Flooring Selection & Layout
04 Rubber Flooring Installation
05 Joint, Edge & Detail Finishing
06 Final Inspection & Handover

Flooring thickness, density, impact resistance, and acoustic performance should be specified according to the intended application and verified product data.



15

SPOR-TECH // 2027 EDITION

SPORTS EQUIPMENT & ACCESSORIES

15 SPORTS EQUIPMENT & ACCESSORIES

COMPLETE EQUIPMENT SOLUTIONS FOR SPORTS FACILITIES

Sportech supports the development of sports facilities with equipment and accessories selected according to the sports involved, the facility layout, and the intended level of use.

1. Equipment for Different Sports
Equipment may include basketball systems, football goals, volleyball and badminton posts, nets, and other sport-specific accessories, subject to the project requirements and available product range.

2. Selection & Technical Compatibility
Equipment selection considers dimensions, intended use, installation requirements, compatibility with the playing surface, and the applicable rules for the sport.

3. Installation & Positioning
Correct positioning, secure fixing, and appropriate installation details are important to the functionality and safe use of sports equipment.

4. Coordinated Facility Solutions
Equipment can be coordinated with court construction, flooring, fencing, and other facility components to support a consistent and well-organized project delivery.

KEY DELIVERY STAGES

01 Identification of Sports & Equipment Needs
02 Technical Selection & Specification
03 Coordination with Court Layouts
04 Supply & Installation, as Agreed
05 Positioning & Fixing Checks
06 Final Inspection & Handover

Equipment models, dimensions, materials, and compliance requirements should be confirmed against the selected products and the project's specifications.

16

SPOR-TECH // 2027 EDITION

SPORTS CONSTRUCTION & INFRASTRUCTURE

16

SPORTS CONSTRUCTION & INFRASTRUCTURE

INTEGRATED CONSTRUCTION FOR SPORTS FACILITIES

Sportech supports sports facility development through coordinated construction works and sports-specific infrastructure. The scope of each project is defined according to site conditions, design requirements, technical specifications, and the client's objectives.

1. Civil Works & Ground Preparation
Sports construction may include site clearance, earthworks, grading, excavation, base preparation, and other civil works required to establish suitable conditions for the planned facility.

2. Drainage & Water Management
Appropriate drainage design and installation are important to manage surface water, protect playing areas, and support the performance of outdoor sports facilities.

3. Fencing & Supporting Structures
Depending on the project, infrastructure works may include perimeter fencing, gates, foundations, equipment supports, and other elements needed for the facility's operation.

4. Coordinated Project Execution
Coordination between civil works, sports surfacing, equipment installation, and finishing helps maintain consistency across the different stages of construction.

KEY PROJECT STAGES

01 Site Assessment & Scope Definition
02 Earthworks & Civil Construction
03 Drainage & Infrastructure Installation
04 Sports Base Preparation
05 Surface, Equipment & Finishing Works
06 Inspection & Handover

The scope of work, construction methods, and technical specifications are established according to the approved design and project requirements.

17

SPOR-TECH // 2027 EDITION

LANDSCAPE DESIGN & CONSTRUCTION

17 LANDSCAPE DESIGN & CONSTRUCTION

LANDSCAPE SOLUTIONS FOR OUTDOOR ENVIRONMENTS

Sportech provides landscape-related solutions intended to create organized, functional, and visually appealing outdoor environments around sports facilities, residential developments, hospitality projects, and other designated spaces.

1. Landscape Planning & Layout
Landscape planning considers site conditions, circulation, intended use, visual character, and the relationship between planted areas, hardscape, and surrounding buildings.

2. Softscape & Planting
Planting solutions may incorporate suitable trees, shrubs, groundcover, and lawn areas selected according to the site environment, water availability, and maintenance requirements.

3. Hardscape & Outdoor Features
Landscape projects may include pathways, paved areas, edging, and other outdoor features, with materials and finishes selected to suit the design and intended use.

4. Irrigation & Site Coordination
Appropriate irrigation planning and coordination with drainage, lighting, and other site services help support the long-term usability and maintenance of landscape areas.

KEY PROJECT STAGES

01 Site Assessment & Design Development
02 Ground Preparation & Leveling
03 Hardscape & Infrastructure Works
04 Irrigation Installation
05 Planting & Landscape Finishing
06 Inspection & Handover

SPORTS VINYL FLOORING

18 SPORTS VINYL FLOORING

RESILIENT VINYL FLOORING FOR INDOOR SPORTS

Sportech provides sports vinyl flooring solutions for selected indoor sports and multipurpose facilities. The appropriate system is determined by the intended sport, impact-management requirements, substrate condition, and manufacturer's technical recommendations.

1. Purpose-Designed Sports Surfaces
Sports vinyl flooring is developed for designated indoor applications and can offer a consistent playing surface when correctly selected and installed for the intended use.

2. Comfort & Impact Management
Depending on the selected system, sports vinyl flooring may incorporate resilient or cushioned construction designed to address underfoot comfort and impact-related requirements.

3. Court Markings & Surface Layout
Sport-specific line markings can be incorporated according to the court layout and the activities planned for the facility, subject to the selected product's compatibility.

4. Substrate Preparation & Installation
Successful installation requires a suitable, dry, stable, and appropriately leveled substrate, together with compatible adhesives, carefully finished seams, and proper installation procedures.

KEY INSTALLATION STAGES

01 Substrate Assessment
02 Surface Preparation & Leveling
03 Vinyl Flooring Installation
04 Seam Finishing & Court Marking
05 Perimeter & Detail Finishing
06 Final Inspection & Handover

The selected flooring must be suitable for the intended sport. Technical performance, installation requirements, and maintenance procedures should follow the manufacturer's documentation.

19

SPOR-TECH // 2027 EDITION

HEALTHCARE VINYL FLOORING

19

HEALTHCARE VINYL FLOORING

FUNCTIONAL FLOORING SOLUTIONS FOR HEALTHCARE ENVIRONMENTS

Healthcare flooring requires careful product selection to meet the functional and hygiene-related needs of medical and healthcare facilities. Sportech can present suitable vinyl flooring options according to the project specifications and the selected manufacturer's documented product characteristics.

1. Hygiene & Ease of Cleaning
Healthcare flooring should support the facility's cleaning procedures and operational requirements. Product selection must consider the cleaning agents, maintenance practices, and hygiene protocols specified for the space.

2. Seam & Joint Detailing
Depending on the selected system and room requirements, flooring details may incorporate appropriately finished seams, welded joints, and compatible skirting details to support effective cleaning.

3. Durability & Daily Use
Flooring should be selected according to expected foot traffic, wheeled equipment, furniture loads, and the specific functional demands of each area.

4. Product Selection by Application
Different areas within a healthcare facility may require different flooring characteristics. Selection should consider the intended use, substrate conditions, slip-resistance requirements, and relevant project standards.

KEY INSTALLATION STAGES

01 Area Assessment & Product Selection
02 Substrate Inspection & Preparation
03 Vinyl Flooring Installation
04 Seam, Joint & Skirting Finishing
05 Inspection & Cleaning
06 Handover & Maintenance Guidance

Hygiene performance, chemical resistance, slip resistance, and other healthcare-related claims must be supported by the selected product's technical documentation and the applicable project requirements.

20

SPOR-TECH // 2027 EDITION

EDUCATIONAL VINYL FLOORING

20 EDUCATIONAL VINYL FLOORING

DURABLE FLOORING FOR EDUCATIONAL FACILITIES

Sportech provides vinyl flooring solutions for educational environments, including selected areas within schools, universities, training centers, and other learning facilities. Product selection is tailored to the room's function, expected traffic, maintenance needs, and project specifications.

1. Designed for Daily Activity
Educational environments experience regular foot traffic and frequent movement of furniture and equipment. Flooring should be selected to suit these conditions and the intended application.

2. Practical Maintenance
Appropriate vinyl flooring can support routine cleaning and maintenance when the selected product is compatible with the facility's cleaning procedures.

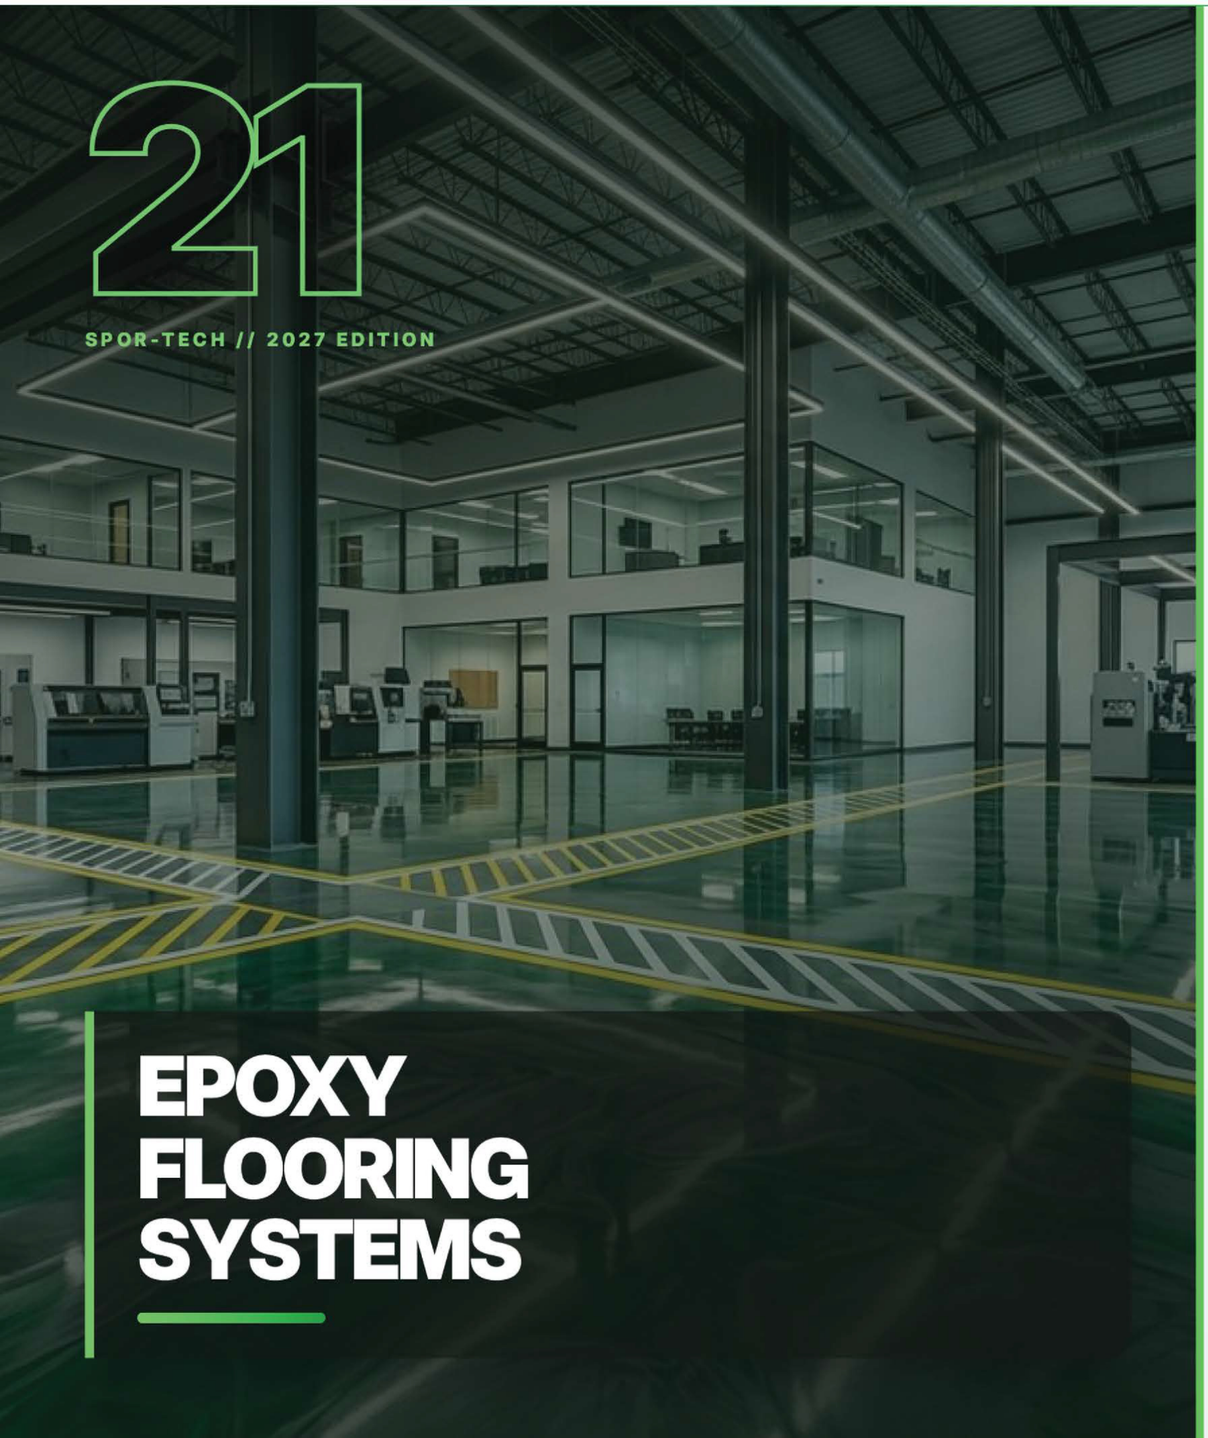
3. Colors & Interior Design
A range of colors and finishes may be considered to complement the interior design, define functional zones, and support the visual identity of the educational environment.

4. Installation Quality
Substrate preparation, accurate installation, properly finished joints, and appropriate edge details contribute to the appearance and service performance of the completed floor.

KEY INSTALLATION STAGES

01 Site Assessment & Area Classification
02 Product Selection & Color Coordination
03 Substrate Preparation
04 Vinyl Flooring Installation
05 Joint & Edge Finishing
06 Final Inspection & Handover

Product selection should account for the intended use, traffic level, maintenance requirements, and any applicable fire, slip-resistance, or indoor-environment criteria.



21

SPOR-TECH // 2027 EDITION

EPOXY FLOORING SYSTEMS

21

EPOXY FLOORING SYSTEMS

SEAMLESS RESIN FLOORING FOR SELECTED APPLICATIONS

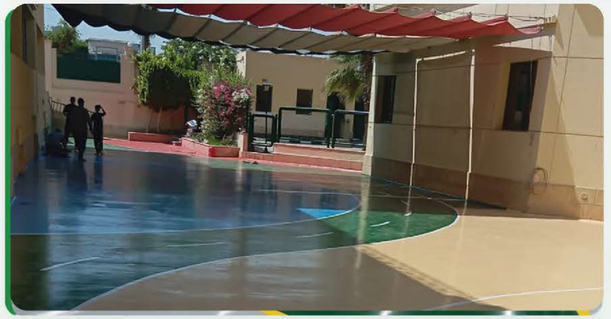
Sportech provides epoxy flooring solutions for suitable commercial, service, and other designated environments, subject to the project requirements and the characteristics of the selected resin system.

1. Seamless Surface Finish
Epoxy flooring can create a continuous resin finish when installed on a suitable substrate, with the final appearance determined by the selected system, preparation method, and application technique.

2. Surface Protection & Durability
The appropriate epoxy system should be selected according to the expected traffic, loading conditions, exposure, and maintenance requirements of the area.

3. System Selection by Application
Different resin systems offer different characteristics. Product selection should consider the substrate, required finish, chemical exposure, slip-resistance needs, and intended use.

4. Substrate Preparation & Application
Successful epoxy installation depends on proper substrate preparation, moisture assessment, suitable surface profiling, and application in accordance with the manufacturer's instructions.



KEY INSTALLATION STAGES

01 Site Assessment & Substrate Testing
02 Surface Preparation & Repair
03 Primer Application
04 Epoxy System Application
05 Final Coat & Surface Finishing
06 Curing, Inspection & Handover

System thickness, number of coats, chemical resistance, slip resistance, and curing time depend on the selected product and the project's technical requirements.

22

SPOR-TECH // 2027 EDITION

ACOUSTIC INSULATION SYSTEMS

22 ACOUSTIC INSULATION FOR FLOORS & WALLS

ADVANCED ACOUSTIC SOLUTIONS FOR NOISE & IMPACT CONTROL

Sportech provides acoustic insulation solutions for floors and walls, designed to help reduce unwanted noise transmission and improve acoustic comfort in residential, commercial, hospitality, and specialized facilities. System selection is tailored to the building structure, noise source, and project-specific acoustic requirements.

1. Impact Sound Insulation for Floors

Floor acoustic systems are designed to help reduce impact noise caused by footsteps, movement, and other activities. Depending on the application, suitable resilient layers can be incorporated beneath floor finishes or within floor assemblies to limit impact sound transmission to adjacent spaces.

2. Acoustic Insulation for Walls

Wall acoustic solutions can help reduce airborne noise transmission between rooms and adjoining spaces. The appropriate system depends on the existing wall construction, required acoustic performance, available installation space, and the nature of the noise source.

3. Tailored Systems for Different Applications

Acoustic requirements vary between residential buildings, hotels, offices, gyms, and other facilities. Sportech works to identify suitable insulation systems according to the project conditions, intended use, and the technical characteristics of the selected materials.

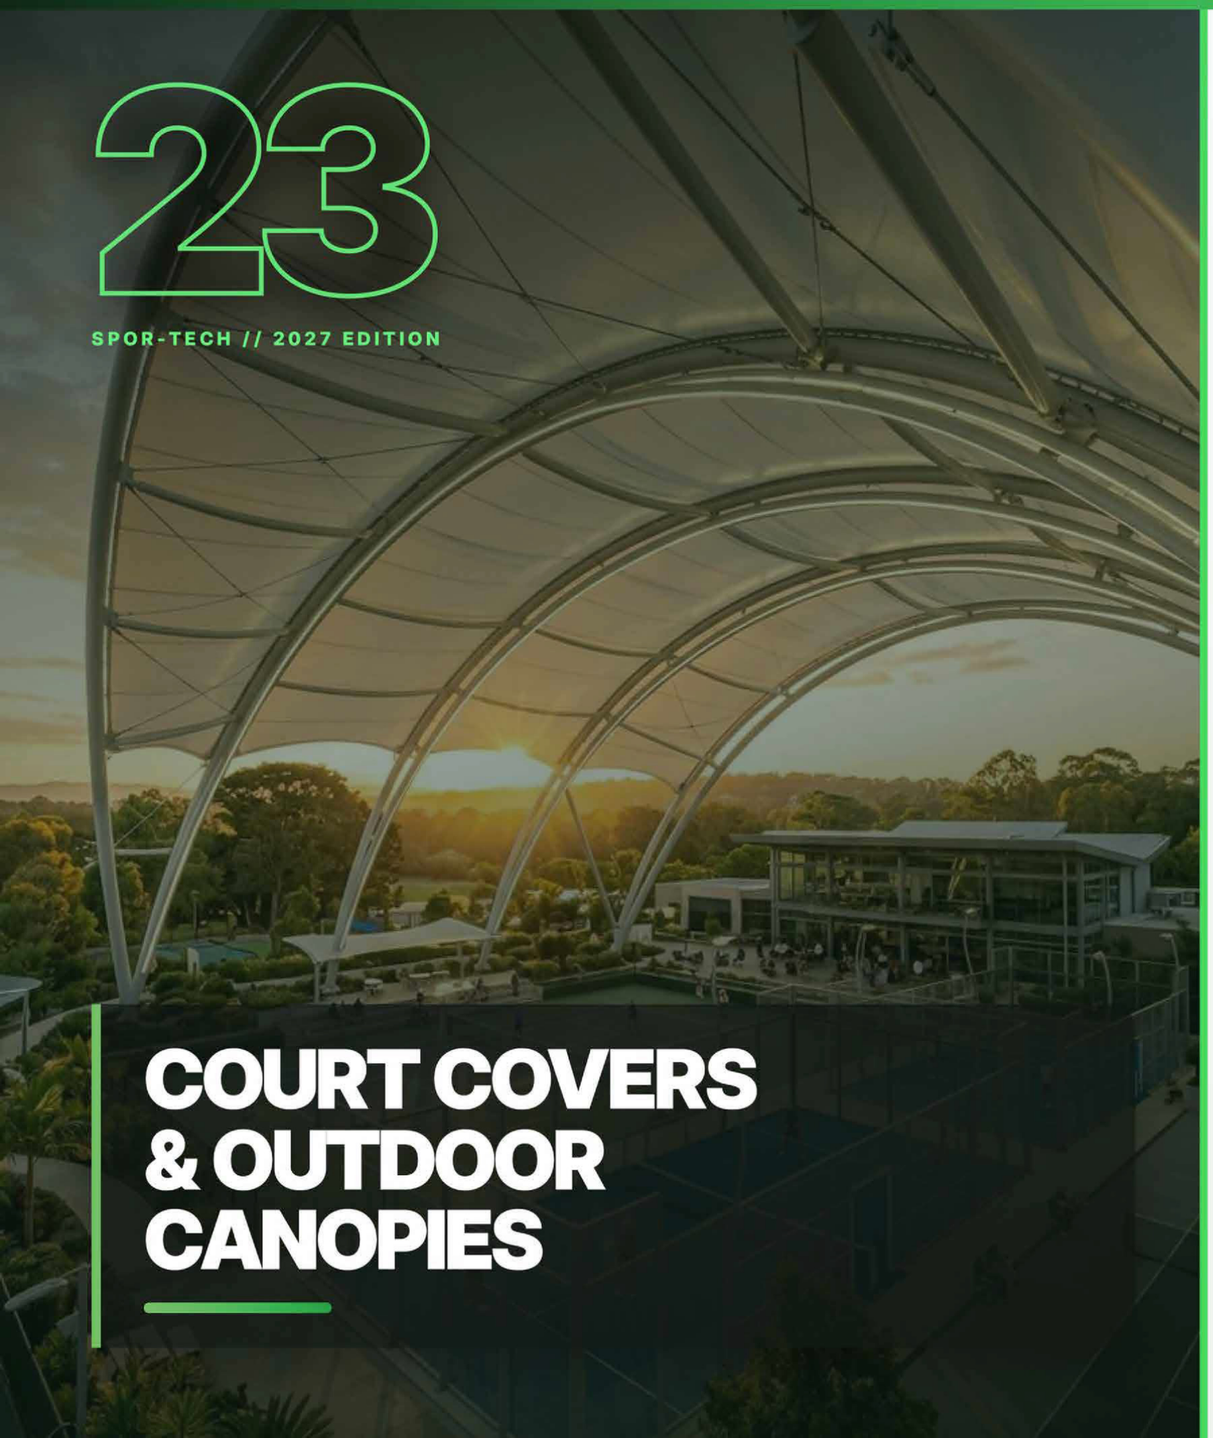
4. System Integration & Installation Quality

Acoustic performance depends on more than the insulation material alone. Proper detailing, perimeter isolation, joints, penetrations, and compatibility with adjacent construction elements are important to achieving the intended system performance.

KEY PROJECT STAGES

01 **Site Assessment & Acoustic Requirements**
02 **Identification of Noise Sources & Building Conditions**
03 **Selection of the Appropriate Acoustic System**
04 **Substrate Preparation & System Installation**
05 **Detailing, Sealing & Interface Coordination**
06 **Final Inspection & Technical Handover**

Acoustic performance depends on the complete construction assembly, installation quality, and site conditions. Sound insulation ratings and test results should be stated only when supported by the selected system's technical documentation or project-specific testing.



23

SPOR-TECH // 2027 EDITION

COURT COVERS & OUTDOOR CANOPIES

23 SPORTS COURT COVERS & OUTDOOR CANOPIES

ENGINEERED COVERING SOLUTIONS FOR SPORTS & OUTDOOR SPACES

Sportech provides covering and canopy solutions designed to improve the usability of outdoor sports facilities and selected open spaces. System selection and design are based on the required coverage, site conditions, structural requirements, environmental exposure, and intended use of the facility.

1. Sports Court Covering Systems

Court covering solutions can help provide protection from direct sunlight and selected weather conditions, allowing facilities to be used more comfortably. The covering system is selected according to the court dimensions, required clearances, and intended sporting activities.

2. Outdoor Canopies & Shaded Areas

Outdoor canopies can be incorporated into sports clubs, schools, residential developments, hospitality facilities, and recreational spaces to create shaded areas for users, spectators, and designated outdoor activities.

3. Structural Design & Material Selection

The supporting structure, covering material, foundations, and connection details must be selected according to the project requirements and the relevant structural design criteria. Wind loads, environmental exposure, drainage, and required clearances are important considerations during design.

4. Integration with Existing Facilities

Covering systems should be coordinated with the existing site layout, sports equipment, lighting, access routes, and surrounding structures. Proper coordination helps maintain functionality and supports efficient installation and long-term use.

KEY PROJECT STAGES

01 Site Assessment & Coverage Requirements
02 Concept Development & Structural Design
03 Foundation & Supporting Structure Preparation
04 Structural Frame Installation
05 Covering Material Installation & Finishing
06 Final Inspection & Handover

The covering type, structural configuration, foundations, and material specifications must be determined by the project design and applicable engineering requirements. Structural safety and wind-load resistance must be verified by qualified professionals.
